

TPMS EuroGuide per i sensori originali

TPMS EuroGuide for OE sensors

L'Euroguide è un documento che permette di identificare il sensore e i service-Kits (parte di ricambio della valvola) corretti per la manutenzione TPMS.

L'ultima versione disponibile della TPMS Euro guide può essere scaricata direttamente dalla sezione download del nostro portale www.tpmseuroshop.it

Ci sono tre differenti viste di coperture nella Euroguide, suddivise come segue:

1. **Marca\Modello\Anno Look up:** questa lista permette di identificare il sensore corretto usando la classificazione per Marca/Modello/Anno
2. **"Sensore Look Up"** partendo dal codice assegnato del sensore originale fornisce l'elenco dei veicoli che sono equipaggiati con quello specifico sensore.
3. **"Service Kits Look up"** partendo dal codice del service Kit originale fornisce l'elenco dei sensori che richiedono quello specifico service-kit

Per qualsiasi richiesta d'informazione, Vi invitiamo a consultare il nostro portale www.tpmseuroshop.it e/o a contattare il nostro Aftermarket support team: mail@italmatic.net

Euroguide is a document allowing to identify the correct sensor and service-Kits (spare part of the valve) for TPMS maintenance.

The latest version available of TPMS Euroguide can be downloaded directly from the download section of our web site www.tpmseuroshop.it

There are three different look up of covering in the Euroguide, split as follows:

1. **Brand\Model\Year Look up:** this list allows to identify the correct sensor using the classification by Brand/Model/Year
2. **"Sensor Look Up"** starting from the code assigned of the original sensor, it gives the list of vehicles which are equipped with that specific sensor.
3. **"Service Kits Look up"** starting from the code of the original service Kit, it gives the list of sensors requiring that specific service-kit

For any request of information, we invite You to consult our web site www.tpmseuroshop.it and/or to contact our Aftermarket support team: mail@italmatic.net

EUROGUIDE - MAKE MODEL YEAR GUIDELINES

The Euroguide is a document to help identify the right products needed for PMS requirements. There are three different cover high lists: a "Make/Model/Year Look up", a "Sensor Look Up" and a "Sensor Kits Look Up".

Make/Model/Year Look up: This list helps identify the right sensors needed using a Make/Model/Year classification.

1. Observe the registration and the model of the car in the column "Make Model".
2. Identify the color of the car in the second column "Color Code".
3. In the column "Year of Application" and "Year of Installation" show the car has been fitted with a PMS direct system by the car manufacturer during that period of time.
4. If the car "fits within" the range of the necessary information in the following columns can be found (same line, then left to the right).
5. "Vehicle Part Number": This is the main after market reference number for the matching sensor for the car.
6. "PMS Sensor Application": This is the manufacturer's part number for the sensor.
7. "Sensor Part Number": This is the name and description of the sensor matching with the peripheral.
8. "Part Number": This is the name and description of the sensor matching with direct PMS systems using the specific sensor indicated in the OE sensor information column.

Make attention of the parameters of the sensors: aftermarket, sensor is a function of the sensor, product weight, description, application, etc.

PMS (Product Information) refers to the information contained in this list and correct, but cannot guarantee 100% accuracy of the information. Customers should always refer to the original product or the website of their "supplier". For further information: sensore@schaeffler.com 0049 93 83 18
